Campaign Launch Social Copy

We have included some sample social copy below that can be shared across your company’s social channels. Please feel free to tweak as you see fit to make the voice most authentic to your brand. Please use the campaign hashtag #TalkAboutVaping whenever possible on Twitter and Instagram to help spread the word.

- **Recommended Channels:** Facebook, Twitter, Instagram and LinkedIn
- **Copy Options:**
 - All kinds of kids vape. Maybe even yours. #TalkAboutVaping
 - Thousands of kids start vaping every single day. Just like smoking, vaping increases kids' risk of lung damage. That’s why it’s so important to #TalkAboutVaping.
 - 1 in 4 US teens has tried vaping. #TalkAboutVaping with your kid(s) before they try it too.
 - Join the movement and #TalkAboutVaping with your kid(s)
 - There’s no one type of kid who vapes. 5.4 million American kids have vaped and it’s time for parents to start talking to their kids about the dangers of e-cigarettes. For facts and resources to help get your head out of the cloud, visit TalkAboutVaping.org.
 - Only 2 in 5 parents are confident that they can influence their child not to vape. Go to TalkAboutVaping.org and get the resources – and confidence boost – you need to help prevent your child from vaping.
 - Have you had the vape talk with your child yet? For tips on how to start the conversation and keep the dialogue going, visit TalkAboutVaping.org and prevent your child from a life of nicotine addiction.

- Stress and peer pressure are universal motivators for kids to try vaping. Every kid is at risk. Know the facts about vaping and start the conversation at [TalkAboutVaping.org](https://www.talkaboutvaping.org).
- 68% of parents say that their child is not the type of kid who vapes, though research shows there's no one type of kid who vapes. It's time to debunk the misconceptions and get your head out of the cloud. Learn more at [TalkAboutVaping.org](https://www.talkaboutvaping.org).
